DETAILED ACTION

Specification

1. The amendment filed February 2, 2005 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: New Fig. 4 is new matter, since Fig. 4 discloses further detail, such as the angle of the walls 24, 25 to the bottom of the opening 21. Furthermore, the limitation "wherein said storage space is a recess that widens outwardly from a bottom to an opening of said storage space" does not preclude various embodiments, for instance the walls may be stepped such that it widens from the bottom to the opening.

Applicant is required to cancel the new matter in the reply to this Office Action.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the recess that widens outwardly from a bottom to an opening of said storage space must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must

Page 3 Application/Control Number: 10/085,110

Art Unit: 3682

be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- Claims 5, 13, and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to 4. comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The structure of the opening is not clear.
- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112: The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- Claims 3, 7, 8, 11, 15, 16, and 20-28 are rejected under 35 U.S.C. 112, second paragraph, 6. as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A . 11 % 2600

Art Unit: 3682

Re: claims 3, 8, 11, 16, and 22: claims 1 and 20 are not generic to both species illustrated in Figs. 1 and 2. Claim 1 only reads on Fig. 2, since the outlets 32 are not oriented substantially along the axis of rotation. It is inaccurate, therefore, that slots 30 extend generally in a tangential direction of said cage.

Re: claims 7 and 15: the limitation "an external face" is not accurate since the applicant sets forth an "outer wall" in claims 1 and 22. There can only be one of an outer wall or an external face.

Re: claims 20-28, the language "the at least one outlet is disposed on the outer wall from an edge portion of the opening" is inaccurate. Openings are areas were material is absent.

Openings, therefore, do not have edge portions.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 8. Claims 1, 2, 4-6, 7, 9, 10, 12-14, 15, 17, and 20-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Daikuhara (USPN 6,402,368).

Daikuhara disclose (Figs. 1 and 7) at least one substantially closed storage space (23) for lubricant between two chambers (21) for rotating elements, said storage space comprising an inner wall, two lateral walls, an outer wall and at least one outlet (24) for the lubricant; wherein

Art Unit: 3682

an opening of the at least only outlet is oriented substantially along the axis of rotation on the same side of the cage as openings of the two chambers.

outlet extends radially (see Fig.2);

plurality of slots that divide an external face of said storage space into generally identical surface portions;

means for operating in depressurized state.

Claim Rejections - 35 USC § 103

- 9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over Azuma (JP 10-220480) in view of Daikuhara.

Azuma shows conduits (9) that open into the first and second lateral walls of said cage

Azuma does not disclose an inner wall.

Daikuhara show an inner wall.

To modify the apparatus of Azuma so as to provide an inner wall would have been obvious to one of ordinary skill in the art at the time the invention was made in view of the teachings of Daikuhara that such an arrangement improves the lubricant storage of the cage.

Art Unit: 3682

Response to Arguments

Applicant's arguments filed February 2, 2005 have been fully considered but they are not persuasive. The applicant argues that the outlet of Daikuhara does not open to the same side as the chambers in the cage. It is submitted that the outlet 24 of Daikuhara opens to the same side as the chambers in the cage, since the chambers 21 have three separate openings one of which opens to the same side of the chambers.

The applicant also argues that the outlets of Daikuhara are not disposed on an outer wall of the storage space from an edge portion of an opening of the substantially closed storage space. In both Figs. 2 and 7, the outlet 24 is disposed on an outer wall of the storage space from an edge portion of an opening of the substantially closed storage space. For instance openings 23 and 24 share a common edge, thus the outlet 24 is disposed on an outer wall of the storage space from an edge portion of an opening 23.

The applicant argues that Azuma does not disclose conduits and provides a dictionary definition of conduit. Azuma discloses conduits in accordance to the definition provided, since conduit 9 carries lubricant.

Conclusion

12. This is a RCE of applicant's earlier Application No. 10/085,110. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in

¹ The applicant claims "at least one outlet."

Application/Control Number: 10/085,110

Art Unit: 3682

this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set

forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley J Van Pelt whose telephone number is 703.305.8176. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Bucci can be reached on 703.308.3668. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
